

- ▶ Are you intrigued by the nutritional impact on an individual's health?
- ▶ Are you a curious person who enjoys research?
- ▶ Are you passionate about the benefits of good nutrition?

**HARNESS THE POWER OF NUTRITIONAL SCIENCE
IN A REWARDING PROFESSION**

“ As a registered dietitian, I was looking for a program that would enhance my skills as a clinician and counselor. The MSCN program at UAMS did just that! The professors and advisors are amazing. One of the best features of the program is that most classes in the program are split between in-class and online coursework, so I was able to work while I acquired my master's degree. ”

Mandy Tennyson, Master of Science in Clinical Nutrition, Class of 2016

CLINICAL NUTRITION

UAMS
Graduate School

A WELL-ESTABLISHED PROGRAM LOCATED IN THE HEART OF A MAJOR MEDICAL CENTER

At the University of Arkansas for Medical Sciences (UAMS), our Master of Science in Clinical Nutrition program focuses on prevention and treatment of obesity, diabetes, cardiovascular disease and cancer through the promotion of healthy diets and lifestyles.

Our program has a strong research component that actively engages students in a variety of research projects. Students participate in practical experiences to enhance their specialized skills to ensure they are well prepared to advance in their careers.

*The UAMS Graduate School is accredited by the Higher Education Commission

A Dynamic Program Incorporates the Profession's Latest Developments

- Registered dietitians and dietitians/nutritionists are trained as advanced-level practitioners seeking to leverage opportunities available only to professionals with a graduate degree.
- Engage with other medical professionals at the many clinical rotations available at UAMS and other facilities throughout the state.
- Students may select one of four specialties: Community Nutrition, Geriatric Nutrition, Pediatric Nutrition or Nutrition and Health Promotion Wellness Emphasis.
- The program is perfect for the practicing professional: Students take mostly online courses with traditional classes once a week and can choose between full-time (2 to 3 years) and part-time (up to 5 years) study.
- Students garner major research successes, publishing articles and presenting the results of their research project at major national conferences.

Take a Leadership Role in Advancing Nutritional Care

Students learn to:

- Serve as advocates for better health through incorporation of sound nutrition principles into policies and programs.
- Manage all aspects of nutritional services through planning, budgeting, supervision and computerized evaluation of food service systems.
- Develop and apply research skills to enhance the practice of clinical nutrition.

Excellent Career Opportunities for Dietitians and Nutrition Experts

- A growing, aging population increases the demand for expert nutrition education and counseling.
- Prospects are particularly bright for graduates with a master's degree as recognition of the impact that nutrition can have in treating and preventing disease creates specialized and advanced-level roles for dietitians.
- Opportunities for registered dietitians are growing faster than those for other professions.
- Job placement for UAMS graduates is 100 percent: master's program graduates work in a variety of settings including academic, research, clinical, community nutrition and independent nutrition consultation and practice in fields such as the food industry, health and marketing.

The Master of Science in Clinical Nutrition at UAMS

The Department of Dietetics and Nutrition offers graduate work leading to a Master of Science degree in Clinical Nutrition through the UAMS Graduate School. The curriculum prepares students for leadership positions as advanced-level practicing health professionals and registered dietitians and nutritionists.
